

CSE 11

Accelerated Intro to Programming

Lecture 15

Greg Miranda, Summer 2 2021

This lecture is being recorded

Announcements

- PA7 due tomorrow @ 11:59pm
- Lecture Quiz 7 due Friday @ 11:59pm
- PA4 & PA5 resubmissions due Friday @ 11:59pm
 - No tutoring hours on Friday
- Exam 2
 - Friday – releasing at 12am
 - Due Saturday @ 4pm

Refined Class Definition

```
class Name <TypeVar1, TypeVar2, ...> {  
    ...class body...  
}
```

Refined Method Definition

```
<TypeVar1, TypeVar2, ...> Type name(Type name, ...) {  
    ...method body...  
}
```

Wrapper Classes

- Integer
- Boolean
- Double

ArrayList

- Must import it from the Java util library
 - `import java.util.ArrayList;`
- <https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/util/package-summary.html#CollectionsFramework>
- <https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/util/ArrayList.html>

Method Overloading

- Same method name has more than one signature in a class or interface

Exceptions

- Throwing errors in order to give more specific and informative error messages
 - `throw new <something throwable>;`

File I/O (input/output)

- `File.readString()`
 - [https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/nio/file/Files.html#readString\(java.nio.file.Path\)](https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/nio/file/Files.html#readString(java.nio.file.Path))
- `Path.get()`
 - [https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/nio/file/Paths.html#get\(java.lang.String,java.lang.String...\)](https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/nio/file/Paths.html#get(java.lang.String,java.lang.String...))

IOException

- IOException documentation
 - <https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/io/IOException.html>

List

- List documentation
 - <https://docs.oracle.com/en/java/javase/13/docs/api/java.base/java/util/List.html>

Challenge

- AverageFile
 - Read in doubles from the path given as the first argument, and print out the mean of those numbers. Assume the file has one number per line.
 - What if the file had the numbers separated by spaces rather than by lines?
- Region
 - Where could we add exceptions in the Regions examples?
